PRODUCT REFERENCE MEMO

SUPERSEDED BRAKE DISCS

A product improvement has been implemented to replace the welded brake disc assemblies with brake discs machined from a solid forged billet. The superseding discs are FAA approved replacement parts, tabulated below.

The new configuration of discs require the 095-10700 **thin washer** (AN960-516L); **replace the thicker** 095-10500 **washer** (AN960-516) to obtain proper lock nut installation. Products containing the 095-00800 **kidney shaped washers** and corresponding **longer bolts** will require these items to be **replaced** with the **thin washer** and proper **length bolts**.

This superseding part number information is to be incorporated into the product catalog at the next revision.

Old P/N	Replacement Part Number	Remarks
164-02501	164-02504	Replace thick with thin washers
164-02502	164-02505	Replace thick with thin washers
164-02503	164-02505	Replace kidney washer & longer bolt - per Service Bulletin SB7033
164-03600	164-03601	Replace thick with thin washers
164-12501	164-12504	Replace thick with thin washers
164-12502	164-12505	Replace kidney washer & longer bolt - per Service Bulletin SB7033
164-13600	164-13601	Replace thick with thin washers

EXAMINE TO ENSURE PROPER LOCK NUT INSTALLATION DURING ASSEMBLY
